CONTACT CLEANER KC-A

PRODUCT DESCRIPTION:

CONTACT CLEANER KC-A is a non-flammable electrical, electronic and avionic cleaner conveniently packaged in an aerosol form to provide the best delivery in cleaning contacts. CONTACT CLEANER KC-A is an excellent flux remover and it has a dielectric strength of 53kV/cm. It is non-corrosive, evaporates rapidly leaving no intrinsic residue. CONTACT CLEANER KC-A is excellent for cleaning metal switches, sensors, connectors, contacts, relays and telecommunication equipment. CONTACT CLEANER KC-A will dissolve hydraulic fluids and can be used to determine leakage sources. It is great for cleaning brakes.

We recommend other fine Roly International products to enhance the effectiveness of the repairs and production with the use of SUPERTECT ST-A, an excellent penetrant/lubricant for electromechanical moving parts.

As is the case with all of the Roly International products, CONTACT CLEANER KC-A is assured to be a factory sealed high quality product developed and made by our own manufacturing facility. Roly International CONTACT CLEANER KC-A can be used relative to MIL-S-50827.

PRODUCT APPLICATION:

To apply Roly International CONTACT CLEANER KC-A just place a catch basin or paper towel underneath small machines, office and business machines and spray the area to be cleaned from the top down. In case of electronic and avionic devices one can see the immediate result of this cleaning action by examining the catch basin or towel for oils, dirt and other contaminants. CONTACT CLEANER KC-A does not contain any 1,1,1-trichloroethane. It is not compatible with some plastics and a test should be done on a small, non-critical part to determine compatibility.

Please refer to our brochures, technical information and material safety data sheets for more details or contact us for any questions you may have regarding our products.
